Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1, drawn to the compound of formula (II), classified in class 540, subclass 519.
- II. Claims 2-7, drawn to compounds, compositions and methods of use of the compound of formula (III), classified in class 548, subclass 453.

The inventions are distinct, each from the other because of the following reasons:

Groups I and II are drawn to structurally dissimilar compounds. They are made and used independently. They are independent and patentably distinct.

If, say compounds of Group I, were anticipated, applicants would not acquiesce in the rejection of Group II thereover or vice-versa. They are patentably distinct.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and because the search required for Group I is not required for Groups II, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Patrick O'Connell on July 12, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant's representative requested a written restriction requirement on July 15, 2005.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1624

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
